PROFILE SUMMARY

Software Engineer with 2.6 years of experience in **Flutter and Dart**, specializing in cross-platform mobile applications for **Android and iOS**. Skilled in building high-quality, scalable, and user-centric solutions with a strong focus on performance optimization, clean code, and responsive UI. Proven ability to contribute end-to-end across the SDLC — from requirement gathering and design to development, debugging, and deployment — while collaborating effectively with cross-functional teams to deliver seamless mobile experiences.

EXPERIENCE

06/2025 – Present
Hyderabad

Software Engineer

Overt Ideas & Solutions PVT.LTD

- **Cross-Platform Mobile Development:** Designing and building high-performance Android & iOS applications using **Flutter (Dart)** and **React Native (JavaScript/TypeScript)**, ensuring responsive UI and seamless user experience across platforms.
- **End-to-End SDLC Contribution:** Actively involved in requirement analysis, UI/UX design, coding, testing, and deployment of mobile applications, ensuring quality and timely delivery at every stage of the lifecycle.
- **Mobile Application Testing & QA:** Conducting Unit Testing, Functional Testing, and Integration Testing for mobile apps on both Android & iOS platforms to ensure reliability, performance, and scalability.
- **Bug Fixing & Performance Optimization:** Performing root-cause analysis, debugging, and performance tuning — including render optimization, memory management, and app size reduction — to enhance overall application stability.
- **State Management & Architecture:** Implementing scalable app architectures using **GetX** (Flutter) to manage complex application states, routing, and dependency injection efficiently.
- **API Integration & Backend Connectivity:** Integrating RESTful APIs, Firebase services, and third-party SDKs to deliver dynamic, data-driven mobile experiences on both platforms.
- **Team Collaboration:** Coordinating with backend developers, QA engineers, and UI/UX teams to align mobile features with client requirements and deliver quality solutions on schedule.

08/2023 – 06/2025
Chennai

Software Engineer

KaremindScripts Pvt Ltd, Chennai

- **Cross-Platform Mobile Development:** Designed and built mobile applications for Android & iOS using **Flutter and Dart**, ensuring high-quality, scalable, and user-centric solutions across both platforms.
- **Team Collaboration:** Partnered with backend developers, UI/UX and QA teams to align project requirements and deliver seamless, well-integrated mobile features on time.
- **Code Quality & Standards:** Maintained clean, reusable, and testable code following Flutter and Dart best practices to ensure long-term product reliability.
- **Performance Optimization:** Improved application responsiveness and stability across Android & iOS by actively addressing bugs, optimizing widget rendering, and fine-tuning Flutter performance.
- **Project Delivery:** Ensured timely completion of Flutter projects through effective planning and prioritization, contributing to smooth releases and client satisfaction.

EDUCATION

06/2014 – 05/2018
Anantapur

B.E Mechanical Engineering
Jawaharlal Nehru Technological University

CORE SKILLS:

Frameworks - Flutter (Android, IOS) - react native (Android)	● ● ● ● ●	Version Control Git	● ● ● ● ●
HTML	● ● ● ● ●	UNIT Testing White Box Testing	● ● ● ● ●
Programming Languages - Dart - Java Script	● ● ● ● ●	Operating Systems Windows	
CSS	● ● ● ● ●	Functional Testing Black Box Testing	● ● ● ● ●

Languages

- Telugu
- English

Organisations

06/2025 – Present **Software Engineer**
Hyderabad

08/2023 – 05/2025 **Software Engineer**

ACTIVE PROJECTS

Father Muller (HMMA)

Technologies Used: Flutter, Dart, REST APIS

- Appointment Booking:** Developed secure and user-friendly features that allowed patients to book, manage, and track medical appointments directly from the app.
- Health Records Management:** Enabled patients to view medical history and treatment updates with real-time API integration, ensuring smooth and reliable access.
- Data Security & Compliance:** Ensured all patient information was handled securely, adhering to **healthcare privacy standards** for data protection.
- Cross-Platform Development:** Designed and implemented a responsive app using **Flutter**, delivering a seamless experience across **Android & iOS** devices.
- Testing & Debugging:** Conducted Unit and Functional Testing with thorough debugging to ensure application stability and high performance across multiple devices.
- Collaboration:** Worked closely with hospital management and staff to align features with operational requirements, enhancing both patient experience and hospital efficiency.

Salem Gopi Hospital (HMMA)

Technologies Used: Flutter, Dart, REST APIS

- Comprehensive Patient Services:** Developed an app that enabled patients to book appointments, track treatment progress, and directly communicate with doctors, providing end-to-end healthcare support.
- Real-Time Updates:** Implemented features for live notifications on appointments, medical updates, and treatment reminders to improve patient engagement.
- Doctor Support Tools:** Created modules for doctors to access patient history and treatment records in real time, improving consultation efficiency.
- Cross-Platform Compatibility:** Delivered a seamless and optimized experience on both **Android & iOS** devices through **Flutter**.

- **Data Privacy & Security:** Applied robust encryption and secure APIs to ensure compliance with **healthcare privacy standards**.
- **Stakeholder Alignment:** Worked closely with hospital management and medical staff to design features aligned with operational goals and regulatory requirements.

Star (HMMA)

Technologies Used: Flutter, Dart, REST APIS

- **Appointment Scheduling:** Designed and implemented features for patients to book, manage, and track appointments with doctors in real time.
- **Patient Records Management:** Developed modules for treatment history tracking and secure access to medical records, ensuring up-to-date information for both patients and doctors.
- **Doctor-Patient Communication:** Enabled direct communication channels between patients and healthcare providers for improved engagement and care.
- **Data Security & Privacy:** Implemented data encryption protocols and privacy controls to safeguard patient information in compliance with **healthcare standards**.
- **Cross-Platform Optimization:** Ensured smooth app performance and compatibility across **Android & iOS**.
- **Stakeholder Collaboration:** Worked with hospital management and staff to align app functionalities with operational and patient-care needs.

Conference Call

Technologies: Flutter, Dart, WebRTC, Firebase, REST APIS

- **Video Conferencing:** Implemented secure one-to-one and group video calls using **WebRTC**, ensuring smooth real-time communication across **Android, iOS, and Web** platforms.
- **Chat & Collaboration:** Integrated real-time chat with support for text, file sharing, and notifications to improve team collaboration during meetings.
- **Meeting Scheduling:** Designed and developed features for meeting creation, scheduling, and reminders, enhancing productivity and user convenience.
- **Cross-Platform Development:** Built responsive and scalable mobile and web applications with **Flutter**, ensuring seamless user experience across devices.
- **Testing & Quality Assurance:** Conducted Unit, Functional, Black Box & White Box Testing to ensure bug-free and high-performance application delivery.
- **Performance Optimization:** Focused on low-latency connections, reduced call drops, and optimized UI rendering for smooth video and chat experiences.

Arete(HMMA)

Technologies Used: Flutter, Dart, REST APIS

- **Appointment Booking:** Developed a secure system for patients to book and manage appointments directly from the app.
- **Health Records Access:** Integrated real-time APIs for patients to view medical history and doctors to track ongoing treatment.
- **User-Friendly Design:** Focused on simple navigation and responsive UI, making healthcare services accessible to patients of all age groups.
- **Testing & Debugging:** Conducted Unit and Functional Testing to maintain application stability across **Android & iOS**.
- **Collaboration:** Partnered with hospital staff to customize features, ensuring smooth adoption by both patients and medical teams.

Employee Attendance Management App

Technologies Used: React Native, JavaScript, Face Recognition/Validation, REST APIs, Firebase

- Developed a cross-platform attendance application for **Android** using **React Native and JavaScript**.
- Implemented **Face Validation** for secure and accurate employee **Check-In & Check-Out** verification.
- Built **Check-In & Check-Out** tracking system capturing real-time timestamps and employee attendance details.
- Developed **Leave Management** module allowing employees to apply, track, and manage leave requests.
- Integrated **Attendance History** feature enabling employees to view their complete attendance records and reports.
- Ensured smooth performance, responsive UI, and reliable data handling across both **Android** platforms.

Declaration

I hereby declare that all the information provided in this resume is true and accurate to the best of my knowledge and belief. I take full responsibility for the authenticity of the details mentioned above.
